

# The **FLOLO** Corporation

## Services Group

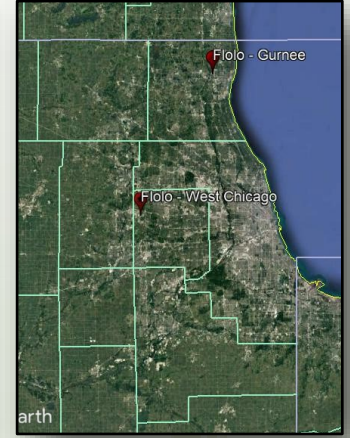

Motor Repair/Reconditioning  
Pump Repair/Reconditioning  
Motor/Drive System Field  
Service

Equipment Alignment  
Vibration Analysis

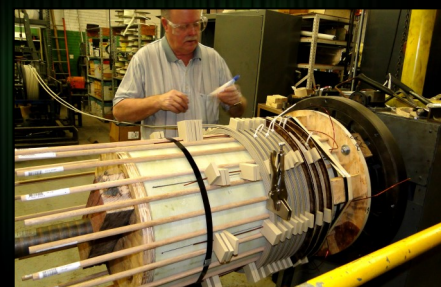

*Over 75 Years in Service*

*EASA Accreditation*

*Highly Trained Service Technicians*

- Flolo provides **solutions** for every electro-mechanical problem. Flolo technicians are trained by the manufacturer and equipped with state-of-the-art test devices to get production up and running and stay running...
- The most sophisticated solid state circuitry, printed boards and electronic drive controllers are analyzed and repaired by Flolo and partners everyday. Whether it's electro-mechanical or the latest high-tech equipment... Flolo handles it all.
- Should power transmission equipment need special mechanical attention, Flolo's in-house machining capacity provides that support day in and day out.
- Flolo's staff of degreed engineers stands ready to examine and evaluate service problems with a wealth of experience and technical training.
- We are equipped to handle NEMA and over NEMA frame motors, explosion - proof (xp) motors and motor/drive custom configurations, that require rewinding/reconditioning.
- Flolo is a licensed electrical contractor, trained to install equipment in all types of production environments.
- Servicing all types of electrically driven equipment means our repair facility has Flolo designed-and-built test panels and all the controls necessary to supply the type of power your equipment requires. The power in your plant can be exactly duplicated in Flolo's test procedures and tested under full load.

## Its What Flolo Does Best.

*“Whether it’s new equipment installation, maintenance or repair, Flolo begins with a thorough understanding of both the mechanical and electrical design and function of your equipment and your production needs”*

### **Flolo Services...**

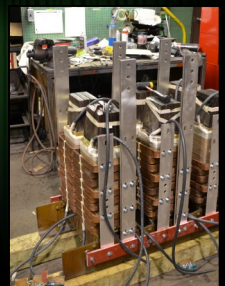

**Starts with people trained to evaluate service situations at every level.**

**Understands equipment service problems and doing the work to solve them.**

**Complete equipment repairs onsite and in our fully equipped shops.**

### **Quick Reference**

- UL Listed Motor Rewinding and reconditioning for XP Motors.
- Reconditioning and rewinding of D.C. and A.C. and as well as wound rotor motors.
- Complete field service of D.C. , A.C., and Servo Drives
- Custom modifications in motor windings and motor mechanical configurations.
- Complete electrical installation of new & used equipment.
- Complete electronic board troubleshooting and repair.
- Repair and modification of mechanical power transmission systems.
- Turnkey engineering and installation of most types and industrial drive systems.
- Overhaul and rebuilding of water, sludge, aeration, sewage, runoff and irrigation pumps.
- Vertical pump motor (solid and hollow-shaft) rebuilding.
- Complete in-house machine shop capabilities.
- Mechanical repair of garmotors, gearboxes and mechanical variable

## QUALITY OBJECTIVE

To implement throughout the company a quality improvement process.

To add a quality improvement team structure to our organization that will find and remove the root causes of problems in our business systems.

To train our employees on the tools of structured problem solving that will identify these issues.

To provide our customers with the best service.

To ensure that every transaction from the initial contact for product or service to the invoice is 100% free of error.

## CUSTOMER MISSION

It is our mission to meet our customers' needs better than any other services, systems or distributor organization by providing the highest levels of customer focused service.

To achieve this mission by:

Making it easy for our customers to do business with us.

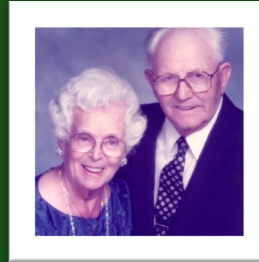

Identifying and meeting our customers' needs for products and services.

Eliminating all the internal barriers that might prevent us from meeting customers needs as efficiently as possible.

## CERTIFICATION

- Motor Repair → UL for XP motors
- EASA Accreditation
- Systems Group → UL Listed
- CSA Certified

## TRADITION

For over 75 years, FLOLO has been an industry leader in sensibly utilizing the latest technology in applications based on the customer's needs. Our industry has adopted technological advances in the way it controls production.

FLOLO has worked hard to be a leader in developing systems that incorporate these new technologies. Most importantly, our customers recognize FLOLO as a leader in implementing these technical advances.

## MISSION STATEMENT

To develop corporate growth and stability for the owners, employees and our industry by being the best supplier of services to a broad base of customers that use industrial electrical, electronic and mechanical products. This is to be accomplished through an atmosphere that allows personal growth and fulfillment of corporate goals while maintaining the highest moral and ethical standards achievable.
